

Muhammad Humail

Software Engineering Student | Full-Stack Developer | AI & C++ Enthusiast

Portfolio: rey-studio.netlify.app | GitHub: github.com/humailkh101-wq | LinkedIn: linkedin.com/in/humailofficial | Sindh, Pakistan

PROFESSIONAL SUMMARY

Software engineering student with a strong foundation in C++, data structures and algorithms, and hands-on experience building modern, responsive web applications with React, Next.js, Node.js and Python. Skilled across the full stack: from accessible, user-first interface design in Figma and Tailwind CSS to REST APIs, authentication and databases (MongoDB / SQL).

Interested in building AI-powered solutions using Python, machine learning and LLMs, and in applying strong problem-solving and OOP design skills to real products. Comfortable with a professional workflow of Git / GitHub, Postman and deployment on Vercel and Netlify.

CAREER OBJECTIVE

To secure an internship or entry-level software engineering role where I can contribute to full-stack and AI-driven products, keep strengthening my engineering fundamentals, and grow into a professional software engineer.

EDUCATION

Bachelor of Software Engineering (in progress)

MUET Jamshoro | 1st semester, 2026 to present

Coursework in progress: C++ programming (university).

TECHNICAL SKILLS

Frontend

Modern, responsive interfaces with smooth interactions.

React / Next.js • JavaScript (ES6+) • TypeScript • Tailwind CSS • HTML5 / CSS3

Backend

Scalable APIs, databases, and server-side logic.

Node.js / Express • Python • REST APIs • MongoDB / SQL • Authentication

AI / ML

Building intelligent, AI-powered solutions.

Python for AI • Machine Learning • TensorFlow / PyTorch • Data Processing • OpenAI / LLMs

C++ / DSA

Strong fundamentals in algorithms and system design.

C++ • Data Structures • Algorithms • OOP Design • Problem Solving

UI / UX

Designing clean, intuitive, user-first experiences.

Figma • Wireframing • Responsive Design • Design Systems • Accessibility

Tools

The workflow that keeps everything shipping smoothly. Also: Vercel / Netlify deployment.

Git / GitHub • VS Code • Postman • Docker (basics)

CERTIFICATIONS AND COURSES

- Python programming course (academy)
- C++ programming (university coursework)

LANGUAGES

English • Urdu • French • Spanish

KEY STRENGTHS

- Strong problem solving and algorithmic thinking (C++, data structures, OOP)
- End-to-end development: UI design, frontend, backend APIs, databases and deployment
- Hands-on use of AI and LLM tooling alongside Python data processing
- Responsive, accessible design with a user-first approach
